

BCCI Wins 2010 Construction Employers' Association Excellence in Safety Award

San Francisco (February 12, 2010) – BCCI, a premier commercial contractor firm, received a 2010 Excellence in Safety award from the Construction Employers' Association (CEA) in a Walnut Creek ceremony yesterday. Information submitted by all participating general contractors is from the year 2008. BCCI was one of only 44 contractors statewide to be honored for its exemplary safety record and commitment to ensuring a safe and healthy workplace for all employees.

BCCI rose above its peers by maintaining a total incident rate and a lost workday incident rate at more than 25 percent below the industry average and maintained an experience modification rate of .58, which is approximately 50 percent lower than the industry average. In fact, over a one-year period, BCCI experienced only one lost workday from a total of 382,643 hours. This was the first time BCCI applied for the CEA safety recognition program.

“The most important aspect of our safety program is the empowerment of our staff. We train each of our employees, from laborers to managers, to make safety a paramount concern and monitor their workplace on a daily basis,” said Mike Fraley, BCCI’s Vice President, Field Operations. “BCCI believes that when production with safety is achieved, production with efficiency is attained simultaneously.”

BCCI develops a safety plan in collaboration with clients during the preconstruction phase of each project. The firm identifies and mitigates safety hazards to maintain a safe environment for the public, the building owner, clients, employees, and sub-contractors.
